**TAIWAN SAKURA CORPORATION AND SUBSIDIARIES
CONSOLIDATED FINANCIAL STATEMENTS
WITH INDEPENDENT AUDITORS' REVIEW REPORT
FOR THE THREE-MONTH PERIODS ENDED
31 MARCH 2025 AND 2024**

Address: No. 436, Section 4, Yatan Road, Daya District, Taichung City
Company phone number: +886-4-25666106

The independent auditors' report and the accompanying consolidated financial statements are the English translation of the Chinese version prepared and used in the Republic of China. If there is any conflict between, or any difference in the interpretation of the English and Chinese language independent auditors' review report and consolidated financial statements, the Chinese version shall prevail.

Independent Auditors' Review Report

To Taiwan Sakura Corporation:

Introduction

We have reviewed the accompanying consolidated balance sheets of Taiwan Sakura Corporation (the "Company") and its subsidiaries as of 31 March 2025 and 2024, the related consolidated statements of comprehensive income, changes in equity and cash flows for the three-month periods ended 31 March 2025 and 2024, and notes to the consolidated financial statements, including the summary of material accounting policies (together "the consolidated financial statements"). Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34, "Interim Financial Reporting" as endorsed and became effective by Financial Supervisory Commission of the Republic of China. Our responsibility is to express a conclusion on these consolidated financial statements based on our reviews.

Scope of Review

Except as explained in the following paragraph, we conducted our reviews in accordance with the Standard on Review Engagements 2410, "Review of Financial Information Performed by the Independent Auditor of the Entity" of the Republic of China. A review of consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the Standards on Auditing of the Republic of China and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Basis for Qualified Conclusion

As explained in Note 4(3), the financial statements of certain insignificant subsidiaries were not reviewed by independent auditors. Those statements reflected total assets of NT\$1,772,815 thousand and NT\$1,766,329 thousand, constituting 16% and 18% of the consolidated total assets, and total liabilities of NT\$291,492 thousand and NT\$329,842 thousand, constituting 6% and 8% of the consolidated total liabilities as of 31 March 2025 and 2024, respectively; and total comprehensive income of NT\$47,887 thousand and NT\$72,589 thousand, constituting 11% and 16% of the consolidated comprehensive income for the three-month periods ended 31 March 2025 and 2024, respectively. As explained in Note 6(8), the financial statements of certain investments in investee companies accounted for under the equity method were not reviewed by independent auditors. Those investments in investee companies under equity method amounted to NT\$1,155,915 thousand and NT\$1,136,003 thousand as of 31 March 2025 and 2024, respectively.

The related shares of profits from the associates and joint ventures under the equity method amounted to NT\$30,145 thousand and NT\$13,757 thousand, and the related shares of other comprehensive income from the associates and joint ventures under the equity method amounted to NT\$11,270 thousand and NT\$33,876 thousand for the three-month periods ended 31 March 2025 and 2024, respectively. The information related to the above subsidiaries and investments in investee companies accounted for under the equity method disclosed in Note 13 was also not reviewed by independent auditors.

Qualified Conclusion

Based on our reviews, except for the effect of such adjustments, if any, as might have been determined to be necessary had the financial statements of certain insignificant subsidiaries and investments in investee companies accounted for using equity method described in the preceding paragraph, nothing has come to our attention that causes us to believe that the accompanying consolidated financial statements do not present fairly, in all material respects, the consolidated financial position of the Company and its subsidiaries as of 31 March 2025 and 2024, and their consolidated financial performance and cash flows for the three-month periods ended 31 March 2025 and 2024, in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34, “Interim Financial Reporting” as endorsed and became effective by Financial Supervisory Commission of the Republic of China.

Notes to Readers

The accompanying consolidated financial statements are intended only to present the consolidated statement of financial position, financial performance and its cash flows in accordance with the accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdictions. The standards, procedures and practices to audit such consolidated financial statements are those generally accepted and applied in the Republic of China.

The independent auditors’ review report and the accompanying consolidated financial statements are the English translation of the Chinese version prepared and used in the Republic of China. If there is any conflict between, or any difference in the interpretation of the English and Chinese language independent auditors’ review report and consolidated financial statements, the Chinese version shall prevail.

Taiwan Sakura Corporation and Subsidiaries

Notes to Consolidated Financial Statements

FOR THE THREE-MONTH PERIODS ENDED
31 MARCH 2025 AND 2024

(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

1. COMPANY HISTORY

Taiwan Sakura Corporation (“the Company”) was established on 20 October 1988. It mainly manufactures and sells gas cookers, water heaters, kitchen appliances, furniture, building materials, metal hardware parts, sports equipment, electric hand tools, sanitary equipment and whole bathroom. In the year of 1992, the company's stock was approved by the authority to be traded on the Taiwan Stock Exchange. It was officially listed on 16 July 1992. Its registered location and main operations are located at No. 436, Section 4, Yatan Road, Daya District, Taichung City.

2. DATE AND PROCEDURES OF AUTHORIZATION OF FINANCIAL STATEMENTS FOR ISSUE

The consolidated financial statements of the Company and its subsidiaries (hereinafter referred to as the “Group”) for the three-month periods ended 31 March 2025 and 2024 were authorized for issue in accordance with the resolution of the Board of Directors on 8 May 2025.

3. NEWLY ISSUED OR REVISED STANDARDS AND INTERPRETATIONS

- (1) Changes in accounting policies resulting from applying for the first-time certain standards and amendments

The Group applied for the first time International Financial Reporting Standards, International Accounting Standards, and Interpretations issued, revised or amended which are recognized by Financial Supervisory Commission (“FSC”) and become effective for annual periods beginning on or after 1 January 2025. The adoption of these new standards and amendments had no material impact on the Group.

- (2) The Q&A related to the early application of certain amendments to IFRS 9 and IFRS 7 "Amendments to the Classification and Measurement of Financial Instruments" issued by the FSC, which has not yet been adopted by the Group as at the date when the Group's financial statements were authorized for issue.

In the Q&A, only Section 4.1 (Classification of Financial Assets) of the application guidance is allowed to early adopt from 1 January 2025. Additionally, entities must also comply with the requirements of paragraphs 20B, 20C and 20D of IFRS 7 and disclose the fact of early adoption of these amendments in the financial statements.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

- (3) Standards or interpretations issued, revised or amended, by International Accounting Standards Board (“IASB”) which have not been endorsed by FSC, and not yet adopted by the Group as at the date when the Group’s financial statements were authorized for issue, are listed below.

Items	New, Revised or Amended Standards and Interpretations	Effective Date issued by IASB
a	IFRS 10 “Consolidated Financial Statements” and IAS 28 “Investments in Associates and Joint Ventures” — Sale or Contribution of Assets between an Investor and its Associate or Joint Ventures	To be determined by IASB
b	IFRS 17 “Insurance Contracts”	1 January 2023
c	IFRS 18 “Presentation and Disclosure in Financial Statements”	1 January 2027
d	Disclosure Initiative – Subsidiaries without Public Accountability: Disclosures (IFRS 19)	1 January 2027
e	Amendments to the Classification and Measurement of Financial Instruments – Amendments to IFRS 9 and IFRS 7	1 January 2026
f	Annual Improvements to IFRS Accounting Standards – Volume 11	1 January 2026
g	Contracts Referencing Nature-dependent Electricity – Amendments to IFRS 9 and IFRS 7	1 January 2026

- (a) IFRS 10“Consolidated Financial Statements” and IAS 28“Investments in Associates and Joint Ventures” — Sale or Contribution of Assets between an Investor and its Associate or Joint Ventures

The amendments address the inconsistency between the requirements in IFRS 10 *Consolidated Financial Statements* and IAS 28 *Investments in Associates and Joint Ventures*, in dealing with the loss of control of a subsidiary that is contributed to an associate or a joint venture. IAS 28 restricts gains and losses arising from contributions of non-monetary assets to an associate or a joint venture to the extent of the interest attributable to the other equity holders in the associate or joint ventures. IFRS 10 requires full profit or loss recognition on the loss of control of the subsidiary. IAS 28 was amended so that the gain or loss resulting from the sale or contribution of assets that constitute a business as defined in IFRS 3 between an investor and its associate or joint venture is recognized in full.

IFRS 10 was also amended so that the gains or loss resulting from the sale or contribution of a subsidiary that does not constitute a business as defined in IFRS 3 between an investor and its associate or joint venture is recognized only to the extent of the unrelated investors’ interests in the associate or joint venture.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

(b) IFRS 17 “Insurance Contracts”

IFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects (including recognition, measurement, presentation and disclosure requirements). The core of IFRS 17 is the General (building block) Model, under this model, on initial recognition, an entity shall measure a group of insurance contracts at the total of the fulfilment cash flows and the contractual service margin. The carrying amount of a group of insurance contracts at the end of each reporting period shall be the sum of the liability for remaining coverage and the liability for incurred claims.

Other than the General Model, the standard also provides a specific adaptation for contracts with direct participation features (the Variable Fee Approach) and a simplified approach (Premium Allocation Approach) mainly for short-duration contracts.

IFRS 17 was issued in May 2017 and it was amended in 2020 and 2021. The amendments include deferral of the date of initial application of IFRS 17 by two years to annual beginning on or after 1 January 2023 (from the original effective date of 1 January 2021); provide additional transition reliefs; simplify some requirements to reduce the costs of applying IFRS 17 and revise some requirements to make the results easier to explain. IFRS 17 replaces an interim Standard – IFRS 4 Insurance Contracts – from annual reporting periods beginning on or after 1 January 2023.

(c) IFRS 18 “Presentation and Disclosure in Financial Statements”

IFRS 18 replaces IAS 1 Presentation of Financial Statements. The main changes are as below:

A. Improved comparability in the statement of profit or loss (income statement)

IFRS 18 requires entities to classify all income and expenses within their statement of profit or loss into one of five categories: operating; investing; financing; income taxes; and discontinued operations. The first three categories are new, to improve the structure of the income statement, and requires all entities to provide new defined subtotals, including operating profit. The improved structure and new subtotals will give investors a consistent starting point for analyzing entities’ performance and make it easier to compare entities.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

B. Enhanced transparency of management-defined performance measures

IFRS 18 requires entities to disclose explanations of those entity-specific measures that are related to the income statement, referred to as management-defined performance measures.

C. Useful grouping of information in the financial statements

IFRS 18 sets out enhanced guidance on how to organize information and whether to provide it in the primary financial statements or in the notes. The changes are expected to provide more detailed and useful information. IFRS 18 also requires entities to provide more transparency about operating expenses, helping investors to find and understand the information they need.

(d) Disclosure Initiative – Subsidiaries without Public Accountability: Disclosures (IFRS 19)

This standard permits subsidiaries without public accountability to provide reduced disclosures when applying IFRS Accounting Standards in their financial statements. IFRS 19 is optional for subsidiaries that are eligible and sets out the disclosure requirements for subsidiaries that elect to apply it.

(e) Amendments to the Classification and Measurement of Financial Instruments – Amendments to IFRS 9 and IFRS 7

The amendments include:

- A. Clarify that a financial liability is derecognised on the settlement date and describe the accounting treatment for settlement of financial liabilities using an electronic payment system before the settlement date.
- B. Clarify how to assess the contractual cash flow characteristics of financial assets that include environmental, social and governance (ESG)-linked features and other similar contingent features.
- C. Clarify the treatment of non-recourse assets and contractually linked instruments.
- D. Require additional disclosures in IFRS 7 for financial assets and liabilities with contractual terms that reference a contingent event (including those that are ESG-linked), and equity instruments classified at fair value through other comprehensive income.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

- (f) Annual Improvements to IFRS Accounting Standards – Volume 11
 - A. Amendments to IFRS 1
 - B. Amendments to IFRS 7
 - C. Amendments to Guidance on implementing IFRS 7
 - D. Amendments to IFRS 9
 - E. Amendments to IFRS 10
 - F. Amendments to IAS 7

- (g) Contracts Referencing Nature-dependent Electricity – Amendments to IFRS 9 and IFRS 7

The amendments include:

- A. Clarify the application of the ‘own-use’ requirements.
- B. Permit hedge accounting if these contracts are used as hedging instruments.
- C. Add new disclosure requirements to enable investors to understand the effect of these contracts on a company’s financial performance and cash flows.

The abovementioned standards and interpretations issued by IASB have not yet endorsed by FSC at the date when the Group’s financial statements were authorized for issue, the local effective dates are to be determined by FSC. The new or amended standards and interpretations have no material impact on the Group.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(1) Statement of Compliance

The consolidated financial statements of the Group for the three-month periods ended 31 March 2025 and 2024 have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers (“the Regulations”) and IAS 34 Interim Financial Reporting as endorsed and became effective by the FSC.

(2) Basis of Preparation

The consolidated financial statements have been prepared on a historical cost basis, except for financial instruments that have been measured at fair value. The consolidated financial statements are expressed in thousands of New Taiwan Dollars (“\$”) unless otherwise stated.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

(3) Basis of Consolidation

Preparation principle of consolidated financial statements

Control is achieved when the Company is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Company controls an investee if and only if the Company has:

- (a) power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee)
- (b) exposure, or rights, to variable returns from its involvement with the investee, and
- (c) the ability to use its power over the investee to affect its returns

When the Company has less than a majority of the voting or similar rights of an investee, the Company considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- (a) the contractual arrangement with the other vote holders of the investee
- (b) rights arising from other contractual arrangements
- (c) the Company's voting rights and potential voting rights

The Company reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control.

Subsidiaries are fully consolidated from the acquisition date, which is the date that the Company obtains control, and they continue to be consolidated until the date that such control ceases. The financial statements of the subsidiaries are prepared for the same reporting period as the parent company, using uniform accounting policies. All intra-group balances, income and expenses, unrealized gains and losses and dividends resulting from intra-group transactions are eliminated in full.

A change in the ownership interest of a subsidiary, without a change of control, is accounted for as an equity transaction.

Total comprehensive income of the subsidiaries is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

If the Company loses control of a subsidiary, it:

- (a) derecognizes the assets (including goodwill) and liabilities of the subsidiary;
- (b) derecognizes the carrying amount of any non-controlling interest;
- (c) recognizes the fair value of the consideration received;
- (d) recognizes the fair value of any investment retained;
- (e) reclassifies the parent's share of components previously recognized in other comprehensive income to profit or loss, or transfer directly to retained earnings if required by other IFRSs; and
- (f) recognizes any resulting difference in profit or loss.

The consolidated entities are listed as follows:

Investor	Subsidiary	Main businesses	Ownership percentage			Remark
			31 Mar. 2025	31 Dec. 2024	31 Mar. 2024	
The Company	Sakura Enterprise (British Virgin Islands) Ltd. (hereinafter referred to as B.V.I.)	Reinvestment to the holding Group in mainland China	100%	100%	100%	
The Company	Svago International Corporation (hereinafter referred to as Svago International)	Originally importing, selling and leasing kitchen appliances, bathroom equipment and metal hardware parts. It changed to gas equipment and parts trading and leasing in 2009.	100%	100%	100%	
The Company	SAKURA Home Collection Co., Ltd. (hereinafter referred to as SAKURA Home Collection)	Interior decoration, installation of electrical appliance, installation of kitchenware and bathroom equipment and other businesses	100%	100%	100%	
The Company	SAKURA PAN PACIFIC HOLDINGS (SINGAPORE) PTE. LTD. (hereinafter referred to as Singapore)	Investment holding	100%	100%	100%	

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

Investor	Subsidiary	Main businesses	Ownership percentage			Remark
			31 Mar. 2025	31 Dec. 2024	31 Mar. 2024	
B.V.I.	Sakura Kitchen (Huanan) Co., Ltd. (hereinafter referred to as Huanan)	Originally manufacturing and selling bathroom equipment and kitchen equipment. It shifted its focus to kitchen appliance sales and real estate leasing in August 2009.	100%	100%	100%	(Note)
Singapore	Mekong Trading Corporation (hereinafter referred to as MK)	Manufacturing and trading gas of equipment and parts	54.99%	54.99%	54.99%	

Note: B.V.I. consists of five companies including Kunshan Honghu, which is 100% invested (see Note 13(3) mainland China Investment Information for details).

The financial statements of some of the consolidated subsidiaries listed above have not been reviewed by independent accountants. As of 31 March 2025 and 2024, the related assets of the subsidiaries which were unreviewed by auditors amounted to \$1,772,815 thousand and \$1,766,329 thousand, respectively; and the related liabilities amounted to \$291,492 thousand and \$329,842 thousand, respectively. The comprehensive income of these subsidiaries amounted to \$47,887 thousand and \$72,589 thousand for the three-month periods ended 31 March 2025 and 2024, respectively.

(4) Foreign Currency Transactions

The Group's consolidated financial statements are presented in New Taiwan Dollars (\$), which is also the Company's functional currency. Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency.

Transactions in foreign currencies are initially recorded by the Group entities at their respective functional currency rates prevailing at the date of transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency closing rate of exchange ruling at the reporting date. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. Non-monetary items that are measured at historical cost in a foreign currency are translated using the exchange rates as of the dates of the initial transactions.

All exchange differences arising on the settlement of monetary items or on translating

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

monetary items are taken to profit or loss in the period in which they arise except for the following:

- (a) Exchange differences arising from foreign currency borrowings for an acquisition of a qualifying asset to the extent that they are regarded as an adjustment to interest costs are included in the borrowing costs that are eligible for capitalization.
- (b) Foreign currency items within the scope of IFRS 9 Financial Instruments are accounted for based on the accounting policy for financial instruments.
- (c) Exchange differences arising on a monetary item that forms part of a reporting entity's net investment in a foreign operation is recognized initially in other comprehensive income and reclassified from equity to profit or loss on disposal of the net investment.

When a gain or loss on a non-monetary item is recognized in other comprehensive income, any exchange component of that gain or loss is recognized in other comprehensive income. When a gain or loss on a non-monetary item is recognized in profit or loss, any exchange component of that gain or loss is recognized in profit or loss.

(5) Translation of foreign currency financial statements

The assets and liabilities of foreign operations are translated into NTD at the closing rate of exchange prevailing at the reporting date and their income and expenses are translated at an average rate for the period. The exchange differences arising on the translation are recognized in other comprehensive income. On the disposal of a foreign operation, the cumulative amount of the exchange differences relating to that foreign operation, recognized in other comprehensive income and accumulated in the separate component of equity, is reclassified from equity to profit or loss when the gain or loss on disposal is recognized.

On the partial disposal of a subsidiary that includes a foreign operation that does not result in a loss of control, the proportionate share of the cumulative amount of the exchange differences recognized in other comprehensive income is re-attributed to the non-controlling interests in that foreign operation. In partial disposal of an associate or jointly arrangement that includes a foreign operation that does not result in a loss of significant influence or joint control, only the proportionate share of the cumulative amount of the exchange differences recognized in other comprehensive income is reclassified to profit or loss.

Any goodwill and any fair value adjustments to the carrying amounts of assets and liabilities

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and expressed in its functional currency.

(6) The standards of which assets and liabilities are classified as current or non-current

An asset is classified as current when:

- (a) The Group expects to realize the asset or intends to sell or consume it during its normal operating cycle.
- (b) The Group holds the asset primarily for the purpose of trading.
- (c) The Group expects to realize the asset within twelve months after the reporting period.
- (d) The asset is cash or cash equivalent unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is classified as current when:

- (a) The Group expects to settle the liability in its normal operating cycle.
- (b) The Group holds the liability primarily for the purpose of trading.
- (c) The liability is due to be settled within twelve months after the reporting period.
- (d) The Group does not have the right at the end of the reporting period to defer settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

(7) Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, demand deposits and short term, highly liquid time deposits or investments that are readily convertible to known amounts of cash which are subject to an insignificant risk of changes in value.

(8) Financial Instruments

Financial assets and financial liabilities are recognized when the Group becomes a party to the contractual provisions of the instrument.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

Financial assets and financial liabilities within the scope of IFRS 9 *Financial Instruments* are recognized initially at fair value plus or minus, in the case of a financial asset or financial liability not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets or financial liabilities.

(a) Financial instruments: Recognition and Measurement

The Group accounts for regular way purchase or sales of financial assets on the trade date.

The Group classified financial assets as subsequently measured at amortized cost, fair value through other comprehensive income or fair value through profit or loss considering both factors below:

- A. the Group's business model for managing the financial assets and
- B. the contractual cash flow characteristics of the financial asset.

Financial assets measured at amortized cost

A financial asset is measured at amortized cost if both of the following conditions are met and presented as note receivables, trade receivables financial assets measured at amortized cost and other receivables etc., on balance sheet as of the reporting date:

- A. the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and
- B. the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Such financial assets are subsequently measured at amortized cost (the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between the initial amount and the maturity amount and adjusted for any loss allowance) and is not part of a hedging relationship. A gain or loss is recognized in profit or loss when the financial asset is derecognized, through the amortization process or in order to recognize the impairment gains or losses.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

Interest revenue is calculated by using the effective interest method. This is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for:

- A. purchased or originated credit-impaired financial assets. For those financial assets, the Group applies the credit-adjusted effective interest rate to the amortized cost of the financial asset from initial recognition.
- B. financial assets that are not purchased or originated credit-impaired financial assets but subsequently have become credit-impaired financial assets. For those financial assets, the Group applies the effective interest rate to the amortized cost of the financial asset in subsequent reporting periods.

Financial asset measured at fair value through other comprehensive income

A financial asset is measured at fair value through other comprehensive income if both of the following conditions are met:

- A. the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and
- B. the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Recognition of gain or loss on a financial asset measured at fair value through other comprehensive income are described as below:

- A. A gain or loss on a financial asset measured at fair value through other comprehensive income recognized in other comprehensive income, except for impairment gains or losses and foreign exchange gains and losses, until the financial asset is derecognized or reclassified.
- B. When the financial asset is derecognized, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment.
- C. Interest revenue is calculated by using the effective interest method. This is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for:

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

1. Purchased or originated credit-impaired financial assets. For those financial assets, the Group applies the credit-adjusted effective interest rate to the amortized cost of the financial asset from initial recognition.
2. Financial assets that are not purchased or originated credit-impaired financial assets but subsequently have become credit-impaired financial assets. For those financial assets, the Group applies the effective interest rate to the amortized cost of the financial asset in subsequent reporting periods.

Besides, for certain equity investments within the scope of IFRS 9 that is neither held for trading nor contingent consideration recognized by an acquirer in a business combination to which IFRS 3 applies, the Group made an irrevocable election to present the changes of the fair value in other comprehensive income at initial recognition. Amounts presented in other comprehensive income shall not be subsequently transferred to profit or loss (when disposal of such equity instrument, its cumulated amount included in other components of equity is transferred directly to the retained earnings) and these investments should be presented as financial assets measured at fair value through other comprehensive income on the balance sheet. Dividends on such investment are recognized in profit or loss unless the dividends clearly represents a recovery of part of the cost of investment.

Financial asset measured at fair value through profit or loss

Financial assets were classified as measured at amortized cost or measured at fair value through other comprehensive income based on aforementioned criteria. All other financial assets were measured at fair value through profit or loss and presented on the balance sheet as financial assets measured at fair value through profit or loss.

Such financial assets are measured at fair value, the gains or losses resulting from remeasurement is recognized in profit or loss which includes any dividend or interest received on such financial assets.

(b) Impairment of financial assets

The Group recognizes a loss allowance for expected credit losses on debt instrument investments measured at fair value through other comprehensive income and financial asset measured at amortized cost. The loss allowance on debt instrument investments measured at fair value through other comprehensive income is recognized in other comprehensive income and not reduce the carrying amount in the balance sheet.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

The Group measures expected credit losses of a financial instrument in a way that reflects:

- A. an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- B. the time value of money; and
- C. reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The loss allowance is measured as follow:

- A. At an amount equal to 12-month expected credit losses: the credit risk on a financial asset has not increased significantly since initial recognition or the financial asset is determined to have low credit risk at the reporting date. In addition, the Group measures the loss allowance at an amount equal to lifetime expected credit losses in the previous reporting period, but determines at the current reporting date that the credit risk on a financial asset has increased significantly since initial recognition is no longer met.
- B. At an amount equal to the lifetime expected credit losses: the credit risk on a financial asset has increased significantly since initial recognition or financial asset that is purchased or originated credit-impaired financial asset.
- C. For trade receivables or contract assets arising from transactions within the scope of IFRS 15, the Group measures the loss allowance at an amount equal to lifetime expected credit losses.
- D. For lease receivables arising from transactions within the scope of IFRS 16, the Group measures the loss allowance at an amount equal to lifetime expected credit losses.

At each reporting date, the Group needs to assess whether the credit risk on a financial asset has increased significantly since initial recognition by comparing the risk of a default occurring at the reporting date and the risk of default occurring at initial recognition. Please refer to Note 12 for further details on credit risk.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

(c) Derecognition of financial assets

A financial asset is derecognized when:

- A. The rights to receive cash flows from the asset have expired
- B. The Group has transferred the asset and substantially all the risks and rewards of the asset have been transferred
- C. The Group has neither transferred nor retained substantially all the risks and rewards of the asset but has transferred control of the asset.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the consideration received or receivable including any cumulative gain or loss that had been recognized in other comprehensive income, is recognized in profit or loss.

(d) Financial liabilities

Classification between liabilities

The Group classifies the instrument issued as a financial liability in accordance with the substance of the contractual arrangement and the definitions of a financial liability.

Financial liabilities

Financial liabilities within the scope of IFRS 9 Financial Instruments are classified as financial liabilities measured at amortized cost upon initial recognition.

Financial liabilities at amortized cost

Financial liabilities measured at amortized cost include interest bearing loans and borrowings that are subsequently measured using the effective interest rate method after initial recognition. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the effective interest rate method amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or transaction costs.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

Derecognition of financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged, cancelled or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified (whether or not attributable to the financial difficulty of the debtor), such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts and the consideration paid or payable, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

(e) Offsetting of financial instruments

Financial assets and financial liabilities are offset and net amount reported in the balance sheet if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

(9) Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- (a) In the principal market for the asset or liability, or
- (b) In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible to by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants in their economic best interest.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

(10) Inventories

Inventories are valued at lower of cost and net realizable value item by item.

Costs incurred in bringing each inventory to its present location and condition are accounted for as follows:

Raw materials and commodity inventory - usually priced at standard cost, adjusted to the actual cost at the settlement date.

Finished goods and work in progress - including direct materials, direct labor and manufacturing costs. Fixed manufacturing costs are apportioned at normal capacity. In-process products and finished products are usually priced at standard cost and are adjusted to the actual cost at the settlement date.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

(11) Investments accounted for under the equity method

The Group's investment in its associate is accounted for using the equity method other than those that meet the criteria to be classified as held for sale. An associate is an entity over which the Group has significant influence. A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

Under the equity method, the investment in the associate or an investment in a joint venture is carried in the balance sheet at cost and adjusted thereafter for the post-acquisition change in the Group's share of net assets of the associate. After the interest in the associate is reduced to zero, additional losses are provided for, and a liability is recognized, only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate. Unrealized gains and losses resulting from transactions between the Group and the associate are eliminated to the extent of the Group's related interest in the associate.

When changes in the net assets of an associate or a joint venture occur and not those that are recognized in profit or loss or other comprehensive income and do not affect the Group's percentage of ownership interests in the associate, the Group recognizes such changes in equity based on its percentage of ownership interests. The resulting capital surplus recognized will be reclassified to profit or loss at the time of disposing the associate on a pro rata basis.

When the associate or a joint venture issues new stock, and the Group's interest in an associate is reduced or increased as the Group fails to acquire shares newly issued in the associate proportionately to its original ownership interest, the increase or decrease in the interest in the associate is recognized in Additional Paid-in Capital and Investment accounted for using the equity method. When the interest in the associate or joint venture is reduced, the cumulative amounts previously recognized in other comprehensive income are reclassified to profit or loss or other appropriate items. The aforementioned capital surplus recognized is reclassified to profit or loss on a pro rata basis when the Group disposes the associate or an investment in a joint venture.

The financial statements of the associate or a joint venture are prepared for the same reporting period as the Group. Where necessary, adjustments are made to bring the accounting policies in line with those of the Group.

The Group determines at each reporting date whether there is any objective evidence that the investment in the associate or an investment in a joint venture is impaired in accordance with IAS 28 *Investments in Associates and Joint Ventures*. If this is the case, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value and recognizes the amount in the 'share of profit or loss of an associate' in the statement of comprehensive income in accordance with IAS 36 *Impairment of Assets*. In determining the value in use of the investment, the Group estimates:

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

- (a) its share of the present value of the estimated future cash flows expected to be generated by the associate or an investment in a joint venture, including the cash flows from the operations of the associate and the proceeds on the ultimate disposal of the investment; or
- (b) the present value of the estimated future cash flows expected to arise from dividends to be received from the investment and from its ultimate disposal.

Because goodwill that forms part of the carrying amount of an investment in an associate is not separately recognized, it is not tested for impairment separately by applying the requirements for impairment testing goodwill in IAS 36 *Impairment of Assets*.

Upon loss of significant influence over the associate, the Group measures and recognizes any retaining investment at its fair value. Any difference between the carrying amount of the associate upon loss of significant influence and the fair value of the retaining investment and proceeds from disposal is recognized in profit or loss. Furthermore, if an investment in an associate becomes an investment in a joint venture or an investment in a joint venture becomes an investment in an associate, the entity continues to apply the equity method and does not remeasure the retained interest.

(12) Property, plant and equipment

Property, plant and equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of dismantling and removing the item and restoring the site on which it is located and borrowing costs for construction in progress if the recognition criteria are met. Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately. When significant parts of property, plant and equipment are required to be replaced in intervals, the Group recognized such parts as individual assets with specific useful lives and depreciation, respectively. The carrying amount of those parts that are replaced is derecognized in accordance with the derecognition provisions of IAS 16 *Property, Plant and Equipment*. When a major inspection is performed, its cost is recognized in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognized in profit or loss as incurred.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

Depreciation is calculated on a straight-line basis over the estimated economic lives of the following assets:

<u>Item</u>	<u>Useful years</u>
Buildings	3-56 years
Machinery equipment	3-11 years
Mold equipment	2-3 years
Transportation equipment	3-16 years
Office equipment	3-9 years
Other equipment	3-16 years

An item of property, plant and equipment and any significant part initially recognized is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset is recognized in profit or loss.

The residual values, useful years and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

(13) Investment property

The Group's owned investment properties are measured initially at cost, including transaction costs. The carrying amount includes the cost of replacing part of an existing investment property at the time that cost is incurred if the recognition criteria are met and excludes the costs of day-to-day servicing of an investment property. Subsequent to initial recognition, other than those that meet the criteria to be classified as held for sale (or are included in a disposal group that is classified as held for sale) in accordance with IFRS 5 *Non-current Assets Held for Sale and Discontinued Operations*, investment properties are measured using the cost model in accordance with the requirements of IAS 16 *Property, plant and equipment* for that model. If investment properties are held by a lessee as right-of-use assets and is not held for sale in accordance with IFRS 5, investment properties are measured in accordance with the requirements of IFRS 16.

Depreciation is calculated on a straight-line basis over the estimated economic lives of the following assets:

<u>Item</u>	<u>Useful years</u>
Buildings	3-56 years

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

Investment properties are derecognized when either they have been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognized in profit or loss in the period of derecognition.

The Group transfers properties to or from investment properties according to the actual use of the properties.

The Group transfers to or from investment properties when there is a change in use for these assets. Properties are transferred to or from investment properties when the properties meet, or cease to meet, the definition of investment property and there is evidence of the change in use.

(14) Leases

The Group assesses whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset for a period of time, the Group assesses whether, throughout the period of use, has both of the following:

- (a) the right to obtain substantially all of the economic benefits from use of the identified asset; and
- (b) the right to direct the use of the identified asset.

For a contract that is, or contains, a lease, the Group accounts for each lease component within the contract as a lease separately from non-lease components of the contract. For a contract that contains a lease component and one or more additional lease or non-lease components, the Group allocates the consideration in the contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components. The relative stand-alone price of lease and non-lease components shall be determined on the basis of the price the lessor, or a similar supplier, would charge the Group for that component, or a similar component, separately. If an observable stand-alone price is not readily available, the Group estimates the stand-alone price, maximizing the use of observable information.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

Group as a lessee

Except for leases that meet and elect short-term leases or leases of low-value assets, the Group recognizes right-of-use asset and lease liability for all leases which the Group is the lessee of those lease contracts.

At the commencement date, the Group measures the lease liability at the present value of the lease payments that are not paid at that date. The lease payments are discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the Group uses its incremental borrowing rate. At the commencement date, the lease payments included in the measurement of the lease liability comprise the following payments for the right to use the underlying asset during the lease term that are not paid at the commencement date:

- (a) fixed payments (including in-substance fixed payments), less any lease incentives receivable;
- (b) variable lease payments that depend on an index or a rate, initially measured using the index or rate as of the commencement date;
- (c) amounts expected to be payable by the lessee under residual value guarantees;
- (d) the exercise price of a purchase option if the Group is reasonably certain to exercise that option; and
- (e) payments of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease.

After the commencement date, the Group measures the lease liability on an amortized cost basis, which increases the carrying amount to reflect interest on the lease liability by using an effective interest method; and reduces the carrying amount to reflect the lease payments made.

At the commencement date, the Group measures the right-of-use asset at cost. The cost of the right-of-use asset comprises:

- (a) the amount of the initial measurement of the lease liability;
- (b) any lease payments made at or before the commencement date, less any lease incentives received;
- (c) any initial direct costs incurred by the lessee; and
- (d) an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

For subsequent measurement of the right-of-use asset, the Group measures the right-of-use asset at cost less any accumulated depreciation and any accumulated impairment losses. That is, the Group measures the right-of-use applying a cost model.

If the lease transfers ownership of the underlying asset to the Group by the end of the lease term or if the cost of the right-of-use asset reflects that the Group will exercise a purchase option, the Group depreciates the right-of-use asset from the commencement date to the end of the useful life of the underlying asset. Otherwise, the Group depreciates the right-of-use asset from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term.

The Group applies IAS 36 *Impairment of Assets* to determine whether the right-of-use asset is impaired and to account for any impairment loss identified.

Except for those leases that the Group accounted for as short-term leases or leases of low-value assets, the Group presents right-of-use assets and lease liabilities in the balance sheet and separately presents lease-related interest expense and depreciation charge in the statement of comprehensive income.

For short-term leases or leases of low-value assets, the Group elects to recognize the lease payments associated with those leases as an expense on either a straight-line basis over the lease term or another systematic basis.

Group as a lessor

At inception of a contract, the Group classifies each of its leases as either an operating lease or a finance lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership of an underlying asset. At the commencement date, the Group recognizes assets held under a finance lease in its balance sheet and present them as a receivable at an amount equal to the net investment in the lease.

For a contract that contains lease components and non-lease components, the Group allocates the consideration in the contract applying IFRS 15.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

The Group recognizes lease payments from operating leases as rental income on either a straight-line basis or another systematic basis. Variable lease payments for operating leases that do not depend on an index or a rate are recognized as rental income when incurred.

(15) Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is its fair value as of the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses, if any. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditure is reflected in profit or loss for the year in which the expenditure is incurred.

The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with a finite useful life is reviewed at least at the end of each financial year. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset is accounted for by changing the amortization period or method, as appropriate, and are treated as changes in accounting estimates.

Intangible assets with indefinite useful lives are not amortized, but are tested for impairment annually, either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in profit or loss when the asset is derecognized.

Patents

The patent right has been granted for a period of 10 years by the relevant government agency.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

Computer software

The cost of computer software is amortized using the straight-line method over its estimated useful life (3 to 5 years).

Trademark rights

As of 2009, the Group purchased TOPAX Ltd. (TOPAX) from the court and invested in Svago International Corporation. Since TOPAX is a trademark of a market leading brand, the Group did not expect the net cash inflow of the asset to cease existence in the foreseeable period. Therefore, the useful life of TOPAX trademark was considered to be undeterminable. The rest of the trademark rights are amortized using the straight-line method over the 10-year period of validity.

A summary of the accounting policies applied to the Group's intangible assets is as follows:

	Patent rights	Computer software	Trademark rights	Other Intangible assets	Goodwill
Useful lives	Finite	Finite	Finite (excluding TOPAX trademark rights)	Finite	Indefinite
Amortization method used	Amortized on the straight-line method over the period of the patent	Amortized on the straight-line method over the estimated useful life	Amortized on the straight-line method over the estimated useful life	Amortized on the straight-line method over the estimated useful life	Not amortized
Internally generated or externally acquired	Acquired	Acquired	Acquired	Acquired	Acquired

(16) Impairment of non-financial assets

The Group assesses at the end of each reporting period whether there is any indication that an asset in the scope of IAS 36 *Impairment of Assets* may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's ("CGU") fair value less costs to sell and its value in use, and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

For assets excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Group estimates the asset's or cash-generating unit's recoverable amount. A previously recognized impairment loss is reversed only if there has been an increase in the estimated service potential of an asset which in turn increases the recoverable amount. However, the reversal is limited to the extent that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years.

A cash generating unit, or groups of cash-generating units, to which goodwill has been allocated is tested for impairment annually at the same time, irrespective of whether there is any indication of impairment. If an impairment loss is to be recognized, it is first allocated to reduce the carrying amount of any goodwill allocated to the cash generating unit (group of units), then to the other assets of the unit (group of units) pro rata on the basis of the carrying amount of each asset in the unit (group of units). Impairment losses relating to goodwill cannot be reversed in future periods for any reason.

An impairment loss of continuing operations or a reversal of such impairment loss is recognized in profit or loss.

(17) Provisions

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Group expects some or all of a provision to be reimbursed, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

The liability to pay a levy is recognised progressively if the obligating event occurs over a period of time.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

Provision for warranties

Warranty provisions are estimated based on management's best estimate of future economic benefits due to warranty obligations (based on historical warranty experience).

(18) Treasury shares

The Company's own equity instruments which are reacquired (treasury shares) by the Group are recognized at cost and deducted from equity. Any difference between the carrying amount and the consideration is recognized in equity.

(19) Revenue recognition

The Group's revenue arising from contracts with customers are primarily related to sale of goods. The accounting policies are explained as follows:

Sale of goods

The Group manufactures and sells goods. Sales are recognized when control of the goods is transferred to the customer and the goods are delivered to the customers (i.e. when the customer has the ability to direct the use of, and obtain substantially all of the remaining benefits from the goods). The main product of the Group is gas cooker, water heaters, kitchen appliances, etc., and revenue is recognized based on the consideration stated in the contract. For certain sales of goods transactions, they are usually accompanied by volume discounts (based on the accumulated total sales amount for a specified period). Therefore, revenue from these sales is recognized based on the price specified in the contract, net of the estimated volume discounts. The Group estimates the discounts using the expected value method based on historical experiences. Revenue is only recognized to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognized will not occur and when the uncertainty associated with the variable consideration is subsequently resolved. During the period specified in the contract, refund liability is recognized for the expected volume discounts.

The Group provides its customer with a warranty with the purchase of the products. The warranty provides assurance that the product will operate as expected by the customers. And the warranty is accounted in accordance with IAS 37.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

The credit period of the Group's sale of goods is from 30 to 90 days. For most of the contracts, when the Group transfers the goods to customers and has a right to an amount of consideration that is unconditional, these contracts are recognized as trade receivables. The Group usually collects the payments shortly after transfer of goods to customers; therefore, there is no significant financing component to the contract. For some of the contracts, the Group has transferred the goods to customers but does not has a right to an amount of consideration that is unconditional, these contacts should be presented as contract assets. Besides, in accordance with IFRS 9, the Group measures the loss allowance for a contract asset at an amount equal to the lifetime expected credit losses.

However, for some rendering of services contracts, part of the consideration was received from customers upon signing the contract, and the Group has the obligation to provide the services subsequently; accordingly, these amounts are recognized as contract liabilities. The period between the transfers of contract liabilities to revenue is usually within one year; thus, no significant financing component is arised.

(20) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective assets. All other borrowing costs are expensed in the period they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

(21) Government grants

Government grants are recognized where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. Where the grant relates to an asset, it is recognized as deferred income and released to income in equal amounts over the expected useful life of the related asset. When the grant relates to an expense item, it is recognized as income over the period necessary to match the grant on a systematic basis to the costs that it is intended to compensate.

Where the Group receives non-monetary grants, the asset and the grant are recorded gross at nominal amounts and released to the statement of comprehensive income over the expected useful life and pattern of consumption of the benefit of the underlying asset by equal annual installments. Where loans or similar assistance are provided by governments or related institutions with an interest rate below the current applicable market rate, the effect of this favorable interest is regarded as additional government grant.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

(22) Post-employment benefit plans

All regular employees of the Company and its domestic subsidiaries are entitled to a pension plan that is managed by an independently administered pension fund committee. Fund assets are deposited under the committee's name in the specific bank account and hence, not associated with the Company and its domestic subsidiaries. Therefore, fund assets are not included in the Group's consolidated financial statements. Pension benefits for employees of the overseas subsidiaries are provided in accordance with the respective local regulations.

For the defined contribution plan, the Company will make a monthly contribution of no less than 6% of the monthly wages of the employees subject to the plan. The Company recognizes expenses for the defined contribution plan in the period in which the contribution becomes due. Overseas subsidiaries make contribution to the plan based on the requirements of local regulations.

Post-employment benefit plan that is classified as a defined benefit plan uses the Projected Unit Credit Method to measure its obligations and costs based on actuarial assumptions. Remeasurements, comprising of the effect of the actuarial gains and losses, the effect of the asset ceiling (excluding net interest) and the return on plan assets, excluding net interest, are recognized as other comprehensive income with a corresponding debit or credit to retained earnings in the period in which they occur. Past service costs are recognized in profit or loss on the earlier of:

- (a) the date of the plan amendment or curtailment, and
- (b) the date that the Group recognizes restructuring-related costs or termination benefits

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset, both as determined at the start of the annual reporting period, taking account of any changes in the net defined benefit liability (asset) during the period as a result of contribution and benefit payment.

Pension cost for an interim period is calculated on a year-to-date basis by using the actuarially determined pension cost rate at the end of the prior financial year, adjusted and disclosed for significant market fluctuations since that time and for significant curtailments, settlements, or other significant one-off events.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

(23) Income tax

Income tax expense (income) is the aggregate amount included in the determination of profit or loss for the period in respect of current income tax and deferred income tax.

Current income tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities, using the tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period. Current income tax relating to items recognized in other comprehensive income or directly in equity is recognized in other comprehensive income or equity and not in profit or loss.

The income tax for undistributed earnings is recognized as income tax expense in the subsequent year when the distribution proposal is approved by the Shareholders' meeting.

Deferred income tax

Deferred tax is provided on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- (a) Where the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination; at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and at the time of the transaction, does not give rise to equal taxable and deductible temporary differences.
- (b) In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint arrangements, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

Deferred tax assets are recognized for all deductible temporary differences, carry forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized, except:

- (a) Where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination; at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and at the time of the transaction, does not give rise to equal taxable and deductible temporary differences.
- (b) In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint arrangements, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the reporting date. The measurement of deferred tax assets and deferred tax liabilities reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities. Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss. Deferred tax items are recognized in correlation to the underlying transaction either in other comprehensive income or directly in equity. Deferred tax assets are reassessed at each reporting date and are recognized accordingly.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current income tax assets against current income tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Interim period income tax expense is accrued using the tax rate that would be applicable to expected total annual earnings, that is, the estimated average annual effective income tax rate applied to the pre-tax income of the interim period. The estimated average annual effective income tax rate only includes current income tax. The recognition and measurement of deferred tax follows annual financial reporting requirements in accordance with IAS 12. The Group recognizes the effect of change in tax rate for deferred taxes in full if the new tax rate is enacted by the end of the interim reporting period, by charging to profit or loss, other comprehensive income, or directly to equity.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

(24) Seasonality of operations

The Group's operation is seasonal in nature, as higher market demand for the Group's products in the second half of the year results in higher revenues in the second half of the year rather than in the first six months.

5. SIGNIFICANT ACCOUNTING ESTIMATES AND ASSUMPTIONS

The preparation of the Group's consolidated financial statements require management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities, at the end of the reporting period. However, uncertainty about these assumption and estimate could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in future periods.

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below:

(1) Impairment of non-financial assets

An impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs to sell and its value in use. The fair value less costs to sell calculation is based on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date less incremental costs that would be directly attributable to the disposal of the asset or cash generating unit. The value in use calculation is based on a discounted cash flow model. The cash flows projections are derived from the budget for the next five years and do not include restructuring activities that the Group is not yet committed to or significant future investments that will enhance the asset's performance of the cash generating unit being tested. The recoverable amount is most sensitive to the discount rate used for the discounted cash flow model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes. The key assumptions used to determine the recoverable amount for the different cash generating units, including a sensitivity analysis, are further explained in Note 6.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

(2) Income tax

Uncertainties exist with respect to the interpretation of complex tax regulations and the amount and timing of future taxable income. Given the wide range of international business relationships and the long-term nature and complexity of existing contractual agreements, differences arising between the actual results and the assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax income and expense already recorded. The Group establishes provisions, based on reasonable estimates, for possible consequences of audits by the tax authorities of the respective counties in which it operates. The amount of such provisions is based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations by the taxable entity and the responsible tax authority. Such differences of interpretation may arise on a wide variety of issues depending on the conditions prevailing in the respective Group company's domicile.

Deferred tax assets are recognized for all carryforward of unused tax losses and unused tax credits and deductible temporary differences to the extent that it is probable that taxable profit will be available or there are sufficient taxable temporary differences against which the unused tax losses, unused tax credits or deductible temporary differences can be utilized. The amount of deferred tax assets determined to be recognized is based upon the likely timing and the level of future taxable profits and taxable temporary differences together with future tax planning strategies. Please refer to Note 6 for unrecognized deferred tax assets.

(3) Accounts receivable – estimation of impairment loss

The Group estimates the impairment loss of accounts receivable at an amount equal to lifetime expected credit losses. The credit loss is the present value of the difference between the contractual cash flows that are due under the contract (carrying amount) and the cash flows that are expected to receive (evaluate forward looking information). However, as the impact from the discounting of short-term receivables is not material, the credit loss is measured by the undiscounted cash flows. Where the actual future cash flows are lower than expected, a material impairment loss may arise. Please refer to Note 6 for more details.

(4) Inventory valuation

Estimates of net realizable value of inventories take into consideration that inventories may be damaged, become wholly or partially obsolete, or their selling prices have declined. The estimates are based on the most reliable evidence available at the time the estimates are made. Please refer to Note 6 for more details.

For investment property pledge, please refer to Note 8.

Investment properties held by the Group are not measured at fair value but for which the fair value is disclosed. The fair value measurements of the investment properties are categorized within Level 3. The fair value of the Group's investment property amounted to \$410,974 thousand, \$410,974 thousand and \$369,714 thousand as of 31 March 2025, 31 December 2024 and 31 March 2024, respectively. The fair value as of 31 December 2024 was evaluated by an independent external appraisal expert, using the cost method to evaluate the price of land, and the comparative method to evaluate the price of buildings. The fair value of investment property as of 31 March 2025 and 2024 was determined by the Group's management using the comparative method and with reference to transaction prices in nearby locations.

The amortized amount of recognized intangible assets is as follows:

	Three-month periods ended 31 March	
	2024	2023
Operating expenses	<u>\$4,719</u>	<u>\$4,388</u>

The recoverable amount of the MK cash-generating unit was determined based on its value in use. The value in use was assessed by management using a five-year financial budget and cash flow projection. The cash flow projections were updated to reflect recent changes in product demand. The value in use was calculated primarily based on the gross profit margin, discount rate, market share during the forecast period and estimated long-term growth rate of cash flows beyond the forecast period. The pre-tax discount rate used in the valuation as of 31 December 2024 was 12.61%. As the recoverable amount calculated based on value in use was lower than the carrying amount as of 31 December 2024, an impairment loss of \$9,063 thousand was recognized in the consolidated statement of comprehensive income.

Warranties

A provision is recognized for expected warranty claims on products sold, based on past experience, management's judgement and other known factors.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

(18)Equities

(a) Common stock

The Company's authorized share capitals amounted to \$4,400,000 thousand and the issued share capitals was \$2,211,212 thousand, all as of 31 March 2025, 31 December 2024 and 31 March 2024. The par value per share was NT\$10 dollar with a total of 221,121,188 shares. Each share is entitled to one vote and the right to receive dividends.

(b) Additional paid-in capital

	<u>31 Mar. 2025</u>	<u>31 Dec. 2024</u>	<u>31 Mar. 2024</u>
Treasury stock transactions	\$76,518	\$76,518	\$67,544
Premium issuance	47,959	47,959	47,959
Donated assets received	16,683	15,516	15,641
Changes in the net value of associates and joint venture equity using the equity method	<u>1,161</u>	<u>1,161</u>	<u>1,161</u>
Total	<u><u>\$142,321</u></u>	<u><u>\$141,154</u></u>	<u><u>\$132,305</u></u>

Under the relevant laws, the capital reserve shall not be used except for making good the deficit of the company. When a company incurs no loss, it may distribute the capital reserves related to the income derived from the issuance of new shares at a premium or income from endowments received by the company. The distribution could be made in cash or in the form of dividend shares to its shareholders in proportion to the number of shares being held by each of them.

Additional paid-in capital - treasury stock trading, which is a subsidiary of the Company - Svago International Corporation, holds the shares of the Company, and the cash dividends of the parent company are subject to the adjustment of the additional paid-in capital - treasury stock transactions.

Additional paid-in capital - the donated assets received are the additional paid-in capital generated by the Company due to the donated assets of the receiving shareholder, and the previous year's cash dividends are not received.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

The equity method is used to recognize the changes in the net value of the related companies and the joint venture equity, which is the additional paid-in capital of the affiliated company, SAKURA (CAYMAN) CO., LTD., which transfers the trademark rights free of charge to the affiliated company, Sakura Bath and Kitchen Products (China) Co., Ltd.

(c) Treasury stock

As of 31 March 2025, 31 December 2024 and 31 March 2024, the fair value of the treasury stock held by the Company's subsidiary, Svago International Corporation, was \$210,014 thousand, \$193,361 thousand and \$194,286 thousand, respectively, and the number of shares held is 2,312,932 for all dates. These shares held by Svago International Corporation were acquitted for the purpose of financing before the amendment of the Company Act on 12 November 2001.

(d) Retained earnings and dividend policies

According to the Company's Articles of Incorporation, current year's earnings, if any, shall be distributed in the following order:

- A. Payment of all taxes and dues;
- B. Offset prior years' operation losses;
- C. Set aside 10% of the remaining amount as legal reserve;
- D. Set aside or reverse special reserve in accordance with law and regulations;
- E. The distribution of the remaining portion, if any, will be recommended by the Board of Directors and resolved in the shareholders' meeting.

The Company's products are diverse, and hence the products' different growth stages may be difficult to identify. Regardless, the Company still expects to make significant investment and financial improvement plans in the next few years. In addition, the Company will distribute at least 30% of the shareholders' dividends in the form of cash when it obtains sufficient external funds to pay for its significant annual capital expenditures.

According to the Company Act, the Company needs to set aside amount to legal reserve unless where such legal reserve amounts to the total paid-in capital. The legal reserve can be used to make good the deficit of the Company. When the Company incurs no loss, it may distribute the portion of legal serve which exceeds 25% of the paid-in capital by issuing new shares or by cash in proportion to the number of shares being held by each of the shareholders.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

When the Company distributes distributable earnings, it shall set aside to special reserve, an amount equal to the difference between the balance of special reserve already set aside according to the requirements for the first time adoption of IFRS, and the net contra account in other equity. For any subsequent reversal of the net contra account in other equity, the amount reversed may be distributed from the special reserve.

In accordance with Ruling No. Jin-Guan-Cheng-Fa-Zi 1090150022 issued by the Financial Supervisory Commission on 31 March 2021, on the first time adoption of the IFRS, for any unrealized revaluation gains and cumulative translation adjustments (gains) recorded on the transfer day that the company elects to transfer to retained earnings by application of the exemption under IFRS 1 "First Adoption of International Financial Reporting Standards", the company shall set aside an equal amount of special reserve. For any subsequent use, disposal of or reclassification of related assets, the amount reversed may be distributed according to the percentage of special reserve that's set aside.

The Company's special surplus reserve amount for the first adoption of IFRS was \$115,799 thousand for both periods ended 1 January 2025 and 1 January 2024. In addition, the Company did not use, dispose or reclassify the relevant assets from 1 January to 31 March 2025 and 2024, and thus revolved the special surplus reserve to the undistributed surplus. As of 31 March 2025 and 2024, the special surplus reserve amount for the first adoption was \$115,799 thousand.

Details of the 2024 and 2023 earnings distribution and dividends per share as approved and resolved by the board of directors' meeting and shareholders' meeting on 11 March 2025 and 19 June 2024, respectively, are as follows:

	Appropriation of earnings		Dividend per share (NT\$)	
	2024	2023	2024	2023
Legal reserve	\$130,965	\$107,492		
Cash dividend – common stock (Note)	1,039,270	857,950	\$4.70	\$3.88

Note: The Company was authorized according to the Articles of Association and passed by special resolution on 11 March 2025 and 13 March 2024, the proposal to distribute common share cash dividends of 2024 and 2023.

Please refer to Note 6(22) for relevant information on the estimation basis and amount for employees' compensation and remuneration to directors.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

The loss allowances of the Group's contract assets and receivables (including notes receivable and accounts receivable) were measured at lifetime expected credit loss. The assessment of the Company's loss allowance as of 31 March 2025, 31 December 2024 and 31 March 2024 is as follows:

- (a) The total carrying amounts of the contract assets were \$299,510 thousand, \$277,848 thousand and \$237,725 thousand, respectively. The amounts of the allowance loss were \$451 thousand, \$468 thousand and \$62 thousand, respectively, based on individual customer assessment method.
- (b) The receivables are divided into groups based on the credit rating, regional and industrial factors of the counterparty, and the matrix is used to measure the allowance loss. The related information is as follows:

As of 31 March 2025

Group1:

	Not yet due (Note)	Days of overdue			Total
		Over a year	Over two years	Over three years	
Gross carrying amount	\$1,382,726	\$216	\$-	\$-	\$1,382,942

Other employee benefits expense	3,697	7,438	11,135	3,315	6,727	10,042
Depreciation	27,866	20,206	48,072	24,156	17,649	41,805
Amortization	1,070	9,437	10,507	1,275	8,530	9,805

According to the Company's Articles of Incorporation, if the Company makes a profit for the year, it shall contribute 2% to 8% as employee remuneration, and no more than 5% as director compensation. However, the profit shall make up for losses first, if any. The above-mentioned employee compensation shall be distributed in stocks or cash and shall be approved by the Board of Directors with more than two-thirds of the directors' attendance and a majority of the directors' consents and the results are reported to the shareholders' meeting. Information about the appropriation of employees' compensation and directors' remuneration of the Company as resolved by the Board of Directors, please refer to the "Market Observation Post System" of the TWSE.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

For the three-month periods ended 31 March 2025, employees' compensation and remuneration to the directors were accrued at \$14,695 thousand and \$9,307 thousand, respectively, which were booked under salary expenses; For the three-month periods ended 31 March 2024, employees' compensation and remuneration to the directors were accrued at \$13,730 thousand and \$8,695 thousand, respectively, which were booked under salary expenses.

A resolution was passed at a board of directors meeting held on 11 March 2025 to distribute \$50,682 thousand and \$32,099 thousand in cash as the employees' compensation and remuneration to directors of 2024, respectively. No material differences existed between the estimated amount and actual distribution of the employees' compensation and remuneration to directors for the year ended 31 December 2024.

No material differences existed between the estimated amount and actual distribution of the employees' compensation and remuneration to directors for the year ended 31 December 2023.

7. RELATED PARTY TRANSACTIONS

Information of the related parties that had transactions with the Company during the financial reporting period is as follows:

Name and nature of relationship of the related parties

<u>Name of the related parties</u>	<u>Nature of relationship of the related parties</u>
Sakura Bath and Kitchen Products (China) Co., Ltd. (hereinafter referred to as Sakura China)	Invested company evaluated by equity method
PUDA Industrial Co., Ltd. (hereinafter referred to as PUDA)	Invested company evaluated by equity method
Sakura Shunde Co., Ltd. (hereinafter referred to as Sakura Shunde)	Subsidiary of the invested company evaluated by the equity method

Significant transactions and balances with related parties

(1) Sales

	Three-month periods ended 31 March	
	2025	2024
Subsidiaries of the invested company evaluated by the equity method	\$17,129	\$17,555

The sales price of the Group to related parties is not significantly different from any third parties. The credit terms range from two to three months after monthly-closing, T/T. In addition, the subsidiary of the Group has leased a factory to the related party, Sakura Bath and Kitchen Products (Shunde) Co., Ltd. since October 2009. The rental income from the operating income for the three-month periods ended 31 March 2025 and 2024 was \$17,129 thousand and \$17,555 thousand, respectively.

(2) Purchases

	Three-month periods ended 31 March	
	2025	2024
Subsidiary of the invested company evaluated by the equity method	\$5,020	\$3,205
Invested company evaluated by equity method	2,271	2,909
Total	\$7,291	\$6,114

The terms of purchases and payment of the Group from related parties is not significantly different from any third parties.

(2) Financial risk management objectives and policies

The Group's principal financial risk management objective is to manage the market risk, credit risk and liquidity risk related to its operating activities. The Group identifies, measures and manages the aforementioned risks based on the Group's policy and risk appetite.

The Group has established appropriate policies, procedures and internal controls for financial risk management. Before entering into significant transactions, due approval process by the Board of Directors and Audit Committee must be carried out based on related protocols and internal control procedures. The Group complies with its financial risk management policies at all times.

(3) Market risk

The Group's market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of the changes in market prices. Market prices comprise currency risk, interest rate risk and other price risks (such as equity instruments).

In practice, it is rarely the case that a single risk variable will change interdependencies between risk variables. However, the sensitivity analysis disclosed below does not take into account the interdependencies between risk variables.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

Foreign currency risk

The Group's exposure to the risk of changes in foreign exchange rates relates primarily to the Group's operating activities (when revenue or expense are denominated in a different currency from the Group's functional currency) and the Group's net investment in foreign operating agencies.

The Group has certain foreign currency receivables to be denominated in the same foreign currency with certain foreign currency payables, therefore natural hedge is received. The Group also uses forward contracts to hedge the foreign currency risk on certain items denominated in foreign currencies. Hedge accounting is not applied as they did not qualify for hedge accounting criteria. Furthermore, as net investments in foreign subsidiaries are for strategic purposes, they are not hedged by the Group.

The foreign currency sensitivity analysis of the possible change in foreign exchange rates on the Group's profit is performed on significant monetary items denominated in foreign currencies as of the end of the reporting period. The impact of foreign currency appreciation/depreciation on the Group's profit and loss. The Group's foreign currency risk is mainly related to the volatility in the exchange rates for USD, CNY and VND. The sensitivity analysis information is as follows:

- (a) When the exchange rate of NT\$ to USD is appreciated/depreciated by 1%, the profit and loss of the Group for the three-month periods ended 31 March 2025 and 2024 is increased/decreased by \$4,375 thousand and \$3,601 thousand, respectively. The equity is decreased/increased by \$8,500 thousand and \$8,370 thousand, respectively.
- (b) When the exchange rate of NT\$ to CNY is appreciated/depreciated by 1%, the profit and loss of the Company for the three-month periods ended 31 March 2025 and 2024 is increased/decreased by \$323 thousand and \$1,200 thousand, respectively. The equity is decreased/increased by \$764 thousand and \$746 thousand, respectively.
- (c) When the exchange rate of NT\$ to VND is appreciated/depreciated by 1%, the profit and loss of the Company for the three-month periods ended 31 March 2025 and 2024 is increased/decreased by \$0 and \$1 thousand, respectively.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group's exposure to the risk of changes in market interest rates relates primarily to the Group's bank borrowings with fixed interest rates.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

Equity price risk

The fair value of the Group's listed and unlisted equity securities and the conversion rights in the issued overseas convertible corporate bonds will be affected by the fair value of the uncertainty of the future value of the investment securities. The listed and unlisted equity securities held by the Group are included in the holdings for trading and provisioning, respectively. The conversion rights of the overseas convertible corporate bonds issued are non-compliance with the definition of equity elements, therefore, they are financial liabilities at fair value through profit or loss. The Group manages the equity price risk through diversifying and placing limits on individual and total equity instruments. Reports on the equity portfolio are submitted to the Group's senior management on a regular basis. The Group's Board of Directors must review and approve all equity investment decisions.

When the price of the Group's listed equity securities held for sale increases/decreases by 1%, the Group's equity would increase/decrease by \$2,460 thousand and \$2,413 thousand, respectively, for the three-month periods ended 31 March 2025 and 2024.

Please refer to Note 12(9) for sensitivity analysis information of other equity instruments or derivatives that are linked to such equity instruments whose fair value measurement is categorized under Level 3.

(4) Credit risk management

Credit risk is the risk that a counterparty will not meet its obligations under a contract, leading to a financial loss. The Group is exposed to credit risk from operating activities (primarily for contract assets, accounts receivable, notes receivable, and lease payments receivables) and from its financing activities, including bank deposits and other financial instruments.

Customer credit risk is managed by each business unit subject to the Group's established policy, procedures and control relating to customer credit risk management. Credit risk assessment for all customers are based on their financial position, ratings from credit rating agencies, historical experiences, prevailing economic condition and the Group's internal rating criteria, etc. Certain customer's credit risk will also be managed by taking credit enhancing procedures (such as requesting for prepayment).

As of 31 March 2025, 31 December 2024 and 31 March 2024, amounts receivable from top ten customers represented 35.16%, 33.77% and 33.94% of the total trade receivables of the Group, respectively. The credit concentration risk of other accounts receivables is insignificant.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

Credit risk from balances with banks, fixed income securities and other financial instruments is managed by the Group's treasury in accordance with the Group's policy. The Group only transacts with counterparties approved by the internal control procedures, which are banks and financial institutions, companies and government entities with good credit rating and with no significant default risk. Consequently, there is no significant credit risk for these counter parties.

(5) Liquidity risk management

The Group's objective is to maintain a balance between continuity of funding and flexibility through the use of cash and cash equivalents, highly liquid equity investments, bank loans and lease contracts. The table below summarizes the maturity profile of the Group's financial liabilities based on the contractual undiscounted payments and contractual maturity. The payment amount includes the contractual interest. The undiscounted payment relating to borrowings with variable interest rates is extrapolated based on the estimated interest rate yield curve as of the end of the reporting period.

Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

(7) Fair values of financial instruments

(a) The methods and assumptions applied in determining the fair value of financial instruments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The following methods and assumptions were used by the Group to measure or disclose the fair values of financial assets and financial liabilities:

- A. The carrying amount of cash and cash equivalents, accounts receivable, accounts payable and other current liabilities approximate their fair value due to their short maturities.
- B. For financial assets and liabilities traded in an active market with standard terms and conditions, their fair value is determined based on market quotation price (including listed equity securities, beneficiary certificates, bonds and futures etc.) at the reporting date.
- C. Fair value of equity instruments without market quotations (including private placement of listed equity securities, unquoted public company and private company equity securities) are estimated using the market method valuation techniques based on parameters such as prices based on market transactions of equity instruments of identical or comparable entities and other relevant information (for example, inputs such as discount for lack of marketability, P/E ratio of similar entities and Price-Book ratio of similar entities).
- D. Fair value of bank loans and other non-current liabilities are determined based on the counterparty prices or valuation method. The valuation method uses DCF method as a basis, and the assumptions such as the interest rate and discount rate are primarily based on relevant information of similar instrument (such as yield curves published by the Taipei Exchange, average prices for Fixed Rate Commercial Paper published by Reuters and credit risk, etc.)

(b) Fair value measurement hierarchy for financial instruments

The carrying amount of the Group's financial assets and liabilities measured at amortized cost approaches fair value.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

(c) Fair value measurement hierarchy for financial instruments

Please refer to Note 12(9) for the fair value measurement hierarchy for financial instruments of the Group.

(8) Derivatives

The Group did not hold any derivatives for trading as of 31 March 2025, 31 December 2024 and 31 March 2024.

(9) Fair value measurement hierarchy

(a) Definition of fair value measurement hierarchy

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, based on the lowest level input that is significant to the fair value measurement as a whole. Level 1, 2 and 3 inputs are described as follows:

Level 1 – Quoted (unadjusted) market prices in active markets for identical assets or liabilities that the entity can access at the measurement date

Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly

Level 3 – Unobservable inputs for the asset or liability

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Group determines whether transfers have occurred between Levels of the hierarchy by reassessing categorization at the end of each reporting period.

(b) Fair value measurement hierarchy of the Group's assets and liabilities

The Group does not have assets that are measured at fair value on a non-recurring basis. Fair value measurement hierarchy of the Group's assets and liabilities measured at fair value on a recurring basis is as follows:

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

Significant unobservable input value information at the level 3 of the fair value hierarchy

The assets of the Group's fair value hierarchy are measured at the fair value. The significant unobservable inputs for fair value measurement are listed in the following table:

As of 31 March 2025:

	Valuation techniques	Significant unobservable inputs	Quantitative information	Relationship between inputs and fair value	Sensitivity analysis of the relationship between input value and fair value
Financial assets:					
Through other comprehensive gains and losses as measured by fair value					
Stock	Cost method	Discount for lack of liquidity	35%	The higher the degree of lack of liquidity, the lower estimated value	When the percentage of lack of liquidity increases (decreases) by the 1%, the company's equity would decrease/increase by NT\$157 thousand.

As of 31 December 2024:

	Valuation techniques	Significant unobservable inputs	Quantitative information	Relationship between inputs and fair value	Sensitivity analysis of the relationship between input value and fair value
Financial assets:					
Through other comprehensive gains and losses as measured by fair value					
Stock	Cost method	Discount for lack of liquidity	35%	The higher the degree of lack of liquidity, the lower estimated value	When the percentage of lack of liquidity increases (decreases) by the 1%, the company's equity would decrease/increase by NT\$157 thousand.

As of 31 March 2024:

Valuation techniques	Significant unobservable inputs	Quantitative information	Relationship between inputs and fair value	Sensitivity analysis of the relationship between input value and fair value
Financial assets:				
Through other comprehensive gains and losses as measured by fair value				
Stock	Cost method	Discount for lack of liquidity	35%	The higher the degree of lack of liquidity, the lower the estimated value
				When the percentage of lack of liquidity increases (decreases) by the 1%, the company's equity would decrease/increase by NT\$157 thousand.

Valuation process used for Level 3 fair value measurements

The Group's Financial Department is responsible for validating the fair value measurements and ensuring that the results of the valuation are in line with market conditions, based on independent and reliable inputs which are consistent with other information, and represent exercisable prices. The Department analyses the movements in the values of assets and liabilities which are required to be re-measured or re-assessed as per the Group's accounting policies at each reporting date.

The above information is disclosed based on the carrying amount of foreign currency (after conversion to functional currency).

Due to the wide variety of individual functional currencies of the Group, it is not possible to disclose the exchange gains and losses information of monetary financial assets and financial liabilities in accordance with each significant foreign currency. The net foreign exchange rate gains of the Group for the three-month period ended 31 March 2025 and 2024 were \$8,355 thousand and \$20,100 thousand, respectively.

(11) Capital management

The primary objective of the Group's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize the shareholder value. The Group manages its capital structure and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the Group may adjust dividend payment to shareholders, return capital to shareholders or issue new shares.

Taiwan Sakura Corporation and Subsidiaries
Notes to Consolidated Financial Statements (continued)
(Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

14. Department information

For management purposes, the Group classifies operating units according to different strategic institutions and is divided into the following three reporting departments:

1. Gas Appliances Department: This department is primarily responsible for the manufacturing and trading of gas appliances.
2. Kitchenware Department: This department is mainly responsible for the manufacturing and trading of system kitchenwares and their related components.
3. Sakura Enterprise (British Virgin Islands) Ltd. (hereinafter referred to as B.V.I.): The department is mainly engaged in financial investment.

The Company has other operating departments that do not meet the quantitative threshold; they mainly engage in property leasing, import business, international business, administrative affairs and interior decoration.

The aforementioned reporting operations department did not aggregate more than one operating department.

The management individually monitors the operational results of its business units to make decisions on resource allocation and performance assessment. The performance of the department is assessed based on pre-tax profit and loss. The accounting policies of the reporting department are the same as the summary of the Group's important accounting policies. However, the income tax on the consolidated financial statements is managed based on Group and is not allocated to the operating department.

The transfer pricing between operational departments is based on regular transactions similar to external third parties.
